

INTERNATIONAL SEARCH REPORT

International application No.

PCT/SE 2004/000901

A. CLASSIFICATION OF SUBJECT MATTER

IPC7: C07D 417/12, C07D 417/14, C07D 401/04, C07D 403/04, C07D 403/14,
C07D 413/04, C07D 413/14, A61K 31/541, 31/54, A61P 11/00, 25/28, 25/00, 9/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC7: C07D, A61K, A61P

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

SE,DK,FI,NO classes as above

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

WPI-DATA, EPO-INTERNAL, PAJ, CHEM.ABS.DATA

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	Bioorganic & Medicinal Chemistry Letters, Vol. 13, Issue 13, 7 July 2003, A. Roderick MacKenzie et al: "4-Amino-2-(aryl)-butylbenzamides and Their conformationally constrained analogues. Potent antagonists of the human neurokinin-2 (NK2) receptor", pages 2211-2215 --	1-32

INTERNATIONAL SEARCH REPORT

International application No.
SE2004/000901

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☒ Claims Nos.: 28-29
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

Claims 28-29 relate to methods of treatment of the human or animal body by surgery or by therapy or diagnostic methods
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

The International Search Authority considers that there are two inventions covered by the claims indicated as follows:

I: Claims: 1-32 directed to novel azetidine derivatives and the intermediate with formula (IV) for those compounds

.../...

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-23, part 24, 25-32

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

International application No.
SE2004/000901

Box II.2

practiced on the human or animal body (PCT Rule 39.1(iv)). Nevertheless, a search has been executed for these claims. The search has been based on the alleged effects of the compounds or compositions.

INTERNATIONAL SEARCH REPORT

International application No.
SE2004/000901

Box III

mentioned in claim 24

II: Claim 24 directed to the intermediate with formula (VI) for those compounds mentioned in the claim

The ISA has carried out a partial search which relates to invention I mentioned above.

The applicant is invited to pay an additional fee for of the inventions II as listed above.

The present application has been considered to contain two inventions which are not linked such that they form a single general inventive concept, as required by Rules 13.1, 13.2 and 13.3 PCT for the following reasons:

Invention I relates novel therapeutical compounds with formula I, which are neurokinin-receptor antagonists and the intermediates with formula (IV) and (V).

Invention II relates to different intermediates.

In order to fulfil the requirements of unity of invention, it is necessary that the intermediate compounds are closely interconnected with the end products. Such close connection requires that the essential structural part of the end product is incorporated by the intermediate compound. However, the present application lacks a single general inventive concept based on the above principle. This leads to the presence of the subjects listed above, each falling under its own restricted inventive concept.

As both problems and solutions are technically so different, no single general concept can be formulated based on the technical features of the inventions. Consequently, the requirements of Rule 13.1 PCT are not met.

It was investigated under Rule 13.2 if any further features, either in the claims or derivable from the description, could be considered as a same or corresponding feature and which could be considered a special technical feature establishing a technical link between the (two) groups of inventions. In particular it was investigated if ... (eventuellt samband mellan de olika uppfinningarna).

No such features were identified.

Consequently, two groups of inventions are not so linked as to form a single general inventive concept as required by Rule 13.1 PCT.
